

UDL LABORATORIES, INC.

is pleased to present the

BAR CODE UPLOAD TOOL

In an effort to help reduce the number of medication errors in hospital and other healthcare settings, the FDA published the *Bar Code Label Requirements for Human Drug Products and Biological Products; Final Rule*, effective April 26, 2004. In order to assist you with the integration of bar coding within your facility, UDL has created a Bar Code Upload Tool.

The Bar Code Upload Tool is an MS Excel database that can be converted into the data format utilized by your in-house pharmacy computer system. Once loaded into your individual system, each different UDL bar code should read and cross reference to the appropriate product information.

Contact your UDL representative if you would like to receive the Bar Code Upload Tool. Or, sign-up today! Complete and e-mail the following information to Dawn Burnell at dawn.burnell@mylanlabs.com.
